

Create and edit Regulation

Jenny Kongkalai - 2023-12-06 - Manage Content

Create and publish a new regulation

To create and publish policies, a user must have one of the following permissions in Holocentric Connect:

- Policy editing
- Model Administration
- Administration

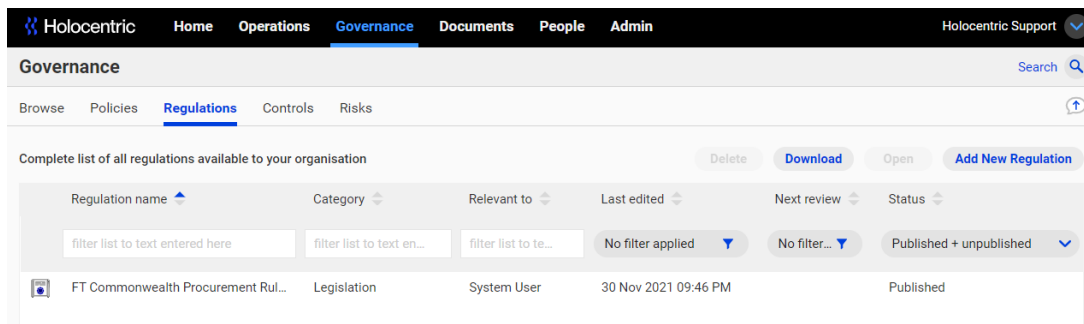

System administrators can change permissions for users by going to **People > Users**.

This article includes the following topics:

1. Add new regulation
2. Approve and publish a new regulation

1. Add new regulation

1.1 Access the **Governance** tab and click **Add New Regulation**. The release management workflow appears. Click **OK** to start editing.

**Image is for illustrative purposes only. Menu bar options vary based on your permissions or organisation's subscription .*

1.2 Complete all the relevant sections in the overview.

Governance > Regulations Search

Add a new Regulation

GENERAL DETAILS

Regulation name: Cancel

Description: Save

External reference identifier:

External source link:

Related Stakeholders: Add

COMPLIANCE

Applicable Obligations: Add

Applicable Policies: Add

Applicable Processes: Add

Note: above screenshot only showcases the selection of fields, more available on scroll.

| Field | Description |
|-------------------------------|---|
| Regulation name | This is shown as the title of the regulation. |
| Description | Overview of the regulation such as background and/or purpose |
| External reference identifier | An identification code/number for the item. This can be used if the item is being migrated from a different system or if a system of identifiers is required. This field is optional. |
| External source link | The source internet URL if linked from an external system |
| Related Documents | Documents that are related to the regulation. |
| Related Stakeholders | Positions that are related to the regulation. |
| Applicable Obligations | Obligations that this regulation applies to |
| Applicable Policies | Policies that this regulation applies to |
| Applicable Processes | Processes that this regulation applies to |
| Summary | A short description of the regulation that appears in the Browse subtab. |
| Roles this is relevant to | The work roles and people to which the regulation is related (e.g. Procurement Analyst) |

| Field | Description |
|--|--|
| Category | The relevant regulation group. |
| Required reading (for customers with Attestation only) | Tick this box to make this item required reading for all roles to which the item is relevant. |
| Keywords for 'Search' | Keywords that, when searched in Holocentric Connect, will make the item come up in search results. |
| Remove from view | Tick the box to hide the item. This will make the item only visible to users with Administrator permissions. Hidden items will: <ul style="list-style-type: none"> • not shown in lists • not shown as a related item on any other items. • not accessible by URL (will show item not found message) • not shown in any downloadable report. |

1.3 Add content to your regulation by creating and writing regulation sections. You can edit the section number, header, and order.

1.4 When you have finished editing click **Save** to commit the changes and click **Finish All Editing**.

**Image is for illustrative purposes only. Menu bar options vary based on your permissions or organisation's subscription .*

1.5 A release management workflow appears. Write a summary of what you added to the regulation and click **Finish All Editing** to move to the approval stage.

Cancel Approve

TIP

If the new policy is part of a larger release (i.e. a release with multiple content updates), leave it marked 'Ready to Publish'. When you are ready, you can publish it at the same time as your other content updates by accessing the **Home** tab and clicking **Manage Changes**.

2.3 To proceed with publication, click **Publishing** and **Publish Immediately**.

**Image is for illustrative purposes only. Menu bar options vary based on your permissions or organisation's subscription .*

When you confirm publication, the release management workflow appears. You have the option to edit the summary of the changes that you have made. Click **Continue**.

2.4 The release label and notes window appears. Write official release notes for the new regulation. You can edit the release notes later if required.

Release label and notes

Publishing: "Regulation"

Label this release:

Release notes:

Post a News Item about this when the items are published

News Item title:

News message:

Include a link to the Release summary

Email notification: Email all users when this News Item is published

| Field | Description |
|--|---|
| Label this release | The official name of this release. |
| Release notes | Details about what updates you have made. |
| Post a news item about this when the items are published | If selected, you can post a news item on the Home tab to notify users about your content changes. |
| News item title | Title of the news item that will appear in the Home tab. |
| News message | The message that will appear under the news item title. |
| Include link in release summary | If selected, this option will allow you to include a link to the release notes for the item. |
| Email all users when this News Item is published | If selected, all web app users in your organisation (provided they have activated their account) will receive an email notification about the release at 5:30 am AEDT/AEST the following day. |

2.5 Click **Publish** to officially release the new regulation. It will now be visible to all web app users in your organisation.
